DETAILED ACTION

Receipt is acknowledged of the response filed on 6 June 2001, which has been entered in the file.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-4, 6-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hattori et al. (US 2003/0132302)(hereinafter referred to as 'Hattori') in view of Okada (US 2001/0040186).

Hattori teaches an IC card serving as a flat transponder comprising a core layer having an IC chip (3b) and a antenna wire, wherein a second sheet comprises a thermoplastic resin (0063), the first and second sheets materials can be paper laminated to the body of the card (0092), the core layer having an antenna and an IC chip serving as a module wherein the connection between the antenna and the chip are embedded as shown in figure 9 (see figs. 1-10).

However, Hattori fails to particularly teach hat the notch.

Okada teaches an IC card having a plurality of notches (4) in V-shaped (see figs. 1A-2; paragraphs 0031+).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teachings of Okada to the teachings of Hattori in order to improve flexibility of the card when the card is forced to bend.

Although, Hattori as modified by Okada fairly suggest that the notches having particular properties such as dimensions, locations, etc., however, it would have been an obvious design variation well within the ordinary skill in the art failing to provide any unexpected results for choosing particular properties of the notches.

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hattori as modified by Okada as applied to claim 1 above, and further in view of Truggelmann et al. (US 5936227)(hereinafter referred to as 'Truggelmann').

The teachings of Hattori/Okada have been discussed above.

Although, Hattori/Okada teaches the card having grooves/notches, they fairly suggest that the grooves/notches are penetrated through the paper layer.

Truggelmann teaches a plastic card having a bending line (SL) with through hole (FS) (see fig. 7; col. 6, lines 10-15).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teachings of Truggelmann to the teachings of Hattori/Okada in order to additional flexibilities using holes within the card.

Response to Arguments

4. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SEUNG H. LEE whose telephone number is (571)272-2401. The examiner can normally be reached on Monday-Friday, 7:30 AM- 4:00 PM.

Application/Control Number: 10/598,788 Page 5
